

Dear Quincy University community:

This message is the seventy-fourth update on Quincy University's response to the COVID-19 pandemic. Here's the simplest possible summary for the current academic semester:

COVID-19 Test Summary for QU Students (Fall 2020)

Number of Student Positive Tests, Active Cases	33*
Number of Previous Positive Tests, Not Active Cases	148
Total Number of Cases Following QU Entry for Fall 2020	181

*One additional student who only takes online courses and does not live locally has tested positive for COVID-19. This student is excluded from our reporting of on-campus and local cases, but we are concerned for the safety and recovery of all QU students.

COVID-19 Data

Here are some of the most relevant data points at present for Quincy University and COVID-19:

- **181** positive COVID-19 viral tests have been reported this semester for QU students after those students arrived at the university. One additional student who only takes online courses and does not live locally also has reported a positive COVID-19 test.
- **Thirty-three** of those 181 students currently have active COVID-19 infections and are in quarantine.
- **148** of those 181 students have completed their quarantine periods and are not active cases.
- **Ninety-eight** students are currently in quarantine, including all active positive cases and many other students who have not tested positive for COVID-19. Because of the different reasons for which people are quarantined, some people may only be quarantined for a few days, while others may be quarantined for two weeks or more.
- **Over 100 rooms** on campus currently are available for quarantine use.
- We are aware of **three** positive COVID-19 tests in the current semester for non-instructional staff members, **one** positive test for a faculty member, and **one** positive test for a vendor's employee. Three of these five individuals are quarantined; two of these five are not active cases. We will continue to be

transparent about the number of COVID-19 cases involving students, employees, and vendors, as we are notified about them.

Surveillance Testing

Quincy University has been conducting surveillance testing of students during the current semester and plans to continue doing so during the spring academic terms for students taking in-person courses. You may recall that surveillance testing is testing of people who do not currently have COVID-19 symptoms and have not been exposed to someone who is COVID-19-positive. Such testing helps us find people with infections who will never show symptoms (i.e., asymptomatic cases) or people who are not yet showing symptoms, though they are infected and will soon experience symptoms. Many other universities, including other universities in our region, are doing little or no surveillance testing, and their COVID-19 numbers are not comparable to ours. Some other universities, including a few in our region, conduct surveillance testing using different and potentially less sensitive tests.

Our Current Situation

Here's our review of the current COVID-19 situation at Quincy University:

1. We continue to follow our plan for COVID-19 testing and to have confidence in that plan. At QU, the combination of symptomatic and surveillance testing is designed to help us limit new infections. Ultimately, though, the best way to reduce our risk for COVID-19 infection is the consistent use of **masking, distancing, and good hand hygiene**. COVID-19 positive test counts will rise and fall from one week to the next.
2. At QU, all available evidence continues to indicate that students are contracting COVID-19 in their social and residential interactions. While students are being careful and behaving responsibly overall, the pattern is that students are contracting the disease in interactions with family, friends, and romantic partners, in both on- and off-campus settings. Thus far, it appears **students are not contracting the disease in classrooms, laboratories, or organized sports practices or games**.
3. In previous COVID-19 updates, we **announced limitations on indoor dining and gatherings on campus, along with requests that all members of our community avoid use of indoor restaurant seating and minimize shopping trips. Those limitations and related requests will remain in place through at least Friday, November 6**. At present, those on campus should eat

outdoors or eat in residence hall rooms, either alone or only in the company of roommates. About **half of all Illinois counties, including Adams County, are at a coronavirus warning level**, and QU must do its part to reduce the spread of COVID-19 infections in the county.

4. **We repeat, once again, our request that faculty and staff join our students in minimizing in-person shopping and avoiding in-person dining while away from campus.** We know these limitations can be difficult, and we will continue to look for better options.

5. We are using **contact tracing** and **quarantining** to find people who may have a COVID-19 infection, to keep them safe, to make certain the right people have testing and medical care, and to prevent those who may have the disease from infecting other people. Our quarantining decisions are made, when appropriate, in consultation with the Adams County Health Department.

6. As we have said many times in the past, it is essential that students, faculty, and staff **report symptoms** of anything that might be COVID-19 as soon as possible. While some of us might be tempted to avoid reporting a symptom on the grounds that the symptom seems minor, a healthcare professional, not an individual student or employee, should make this determination. **There is no acceptable reason for failing to inform us about a medical symptom that might point to COVID-19.**

7. **If you intend for any reason to have a COVID-19 test** or you have taken a COVID-19 test not arranged by the university, **please contact Dr. Tracy immediately** with the details of your situation.

8. The **Health and Well Being Clinic** is open to all students and offers Nurse Practitioner Services and Counseling Services. If you need counseling services, please call 217-222-6550 ext. 3418 and set up a telehealth appointment, a face-to-face appointment on our campus, or an appointment at QMG at no cost. If you need to consult with the Nurse Practitioner, please see her on the Friars' Hall main floor during the times listed below. She will be offering **flu shots** for all students who want one, and flu shots are strongly encouraged for all of us during the pandemic.

Monday	1:00 pm – 5:00 pm
Tuesday	8:30 am – 12:30 pm
Thursday	12:00 pm – 4:00 pm

9. As a reminder, asymptomatic people who are infected with the virus pose very little risk to members of our community if all of us are wearing masks, practicing physical distancing, and committed to good hand hygiene.

10. Quincy University will **provide public health and safety guidance next week for students who are living on or near campus and plan to travel to be with family and friends during the Thanksgiving and December holidays.** This same guidance will also be relevant to some faculty and staff. It

is important that all members of our community do their part to prevent transmission of COVID-19 over the holidays.

If you are a member of the QU community and have not read the previous update messages, you could search them out in your email folders or read them at <https://www.quincy.edu/coronavirus/>. The QU coronavirus website contains a video highlighting many safety procedures for the QU community. The website also includes a Q&A document. The next COVID-19 email update from the university is anticipated no later than November 2, 2020.

Local and State Reports on COVID-19 Cases

As background for our safety measures at QU, we continue to report local and statewide COVID-19 information to all members of our community. As of today, a total of 1,939 COVID-19 cases have been reported in the **Quincy region (i.e., Adams County)**, 255 of which are considered active cases. Some of these cases spread within households. The Quincy region also has had 38,684 confirmed negative COVID-19 tests. There are 41 current hospitalizations in Adams County linked to COVID-19. One Missouri resident has died in Adams County of causes related to COVID-19, as have 21 Adams County residents.

There have been 382,985 COVID-19 cases in **Illinois**. More information about COVID-19 cases in Illinois, including county-by-county reports, is available at <https://www2.illinois.gov/sites/coronavirus/Pages/default.aspx>. These QU updates on COVID-19 cases are taken from the public reports of state and county agencies.

Missouri has begun reporting its COVID-19 cases only for the past seven days. Information about COVID-19 in Missouri is available at <https://showmestrong.mo.gov/data/public-health/>.

President McGee congratulates those who reported their *Star Trek* quiz results following the last COVID-19 update. There are some serious fans out there in QU Hawk Nation! President McGee will leave you to determine whether we have Trekkers or Trekkies at QU. We did learn that perfect and near perfect quiz scores are possible for both employees and students.

Hawks, this has not been a good week for COVID-19 cases in Adams County, in Illinois, and in most of the country. Please do your part to help: Stay masked, maintain

your distance, and remain at home or in your room whenever you can. Our ability to return more quickly to normal activities depends on our progress in reducing the spread of the disease. All of us need to get this right.

After several months of pandemic warnings, many of us know people, including family members, who are or have been seriously ill with this disease. Please pray for the safety of all those with COVID-19, including those who are still not fully recovered from their infections.

Sincerely,

Dr. Brian McGee, President

Dr. Christine Tracy, Vice President for Student Development
